CAREER OBJECTIVE

I am Harshala Athani, a highly motivated and skilled professional with a strong foundation in Angular, Java, and SQL technologies. My passion for creating seamless and efficient web applications drives my commitment to staying at the forefront of these ever-evolving technologies. Seeking good opportunities in IT firm.

KEY COMPETENCIES

Front - End Development

- Angular
- Html
- Css

Back - End Development

- Java

Database

- Sql

PERSONAL PROJECTS

Car Rental - Developing

Angular and Spring Boot

Angular ensures a modern and responsive user interface, facilitating seamless navigation for both customers and administrators. Intuitive design for easy booking, vehicle selection. Extensive database management using Java enables a comprehensive catalog of available vehicles. Detailed vehicle listings with specifications, images. User authentication and authorization mechanisms implemented in Java for secure access control with the help of JWT token. Java-powered backend administration dashboard for effective management of bookings, customer profiles, and vehicle inventory.

Live Cricket Score - Developed

Angular and Spring Boot

Angular on the frontend and Spring Boot on the backend. This dynamic and user-friendly platform keeps cricket enthusiasts updated in real-time with the latest scores. Having a Navbar navigating to Live matches, All matches and Points Table. Real time is done with the help of web scrapping.

Dynamic Blog Webpage - Developed

Angular

Angular is used as Front-end and Firebase is for database. Where the admin will have all the access of posts, categories and subscribers. Where the users will able to see the blog posted by the admin of daily basis. The admin will have all the rights to show the featured posts and unfeatured posts.
